

How to use the app:

Clone the main git repository.

Open it in your IDE of preference (used VSCODE for it)

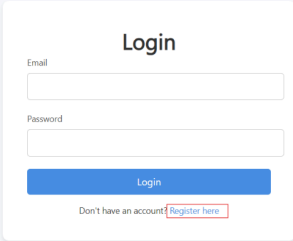

CD into the Backend and do 'npm install' to get all the packages. Then, run 'node server.js' to initialize the server.

To test the routing, cd into Backend/tests and run 'npm test'

CD into the calendar app and do 'npm install' to get all the packages. Then, run 'npm start' to initialize the app.

STEP BY STEP OF APP USE

Click on the register here:

A login form is displayed on a light purple background. The form is a white rectangle with a light gray border. At the top, it has the title "Login" in bold black text. Below the title, there are two input fields: the first is labeled "Email" and the second is labeled "Password". Both labels are in a small, gray font. Below the "Password" field, there is a blue button with the text "Login" in white. At the bottom of the form, there is a link that says "Don't have an account? [Register here](#)". The link text is in a small, gray font, and the "Register here" part is underlined and colored red.

In the app, you can register an account with your desired username, email, and password.

This page will display when you log in:

On the left side, you can click to see your calendar:

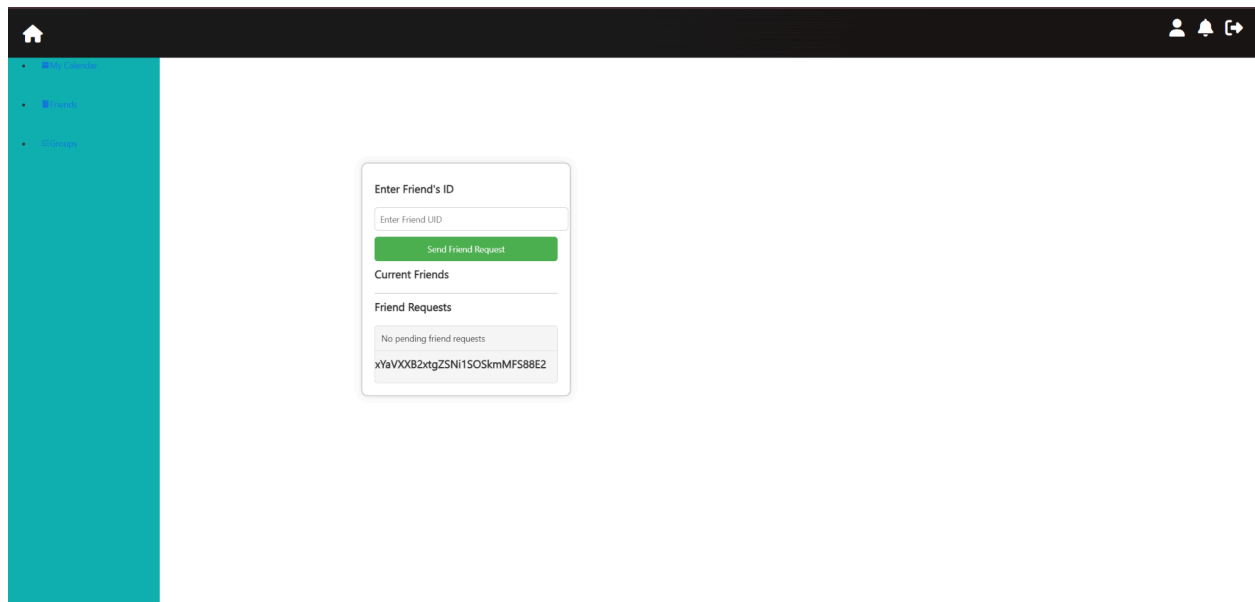

By clicking on a time slot you can add an event and a time for the reminder of that event:

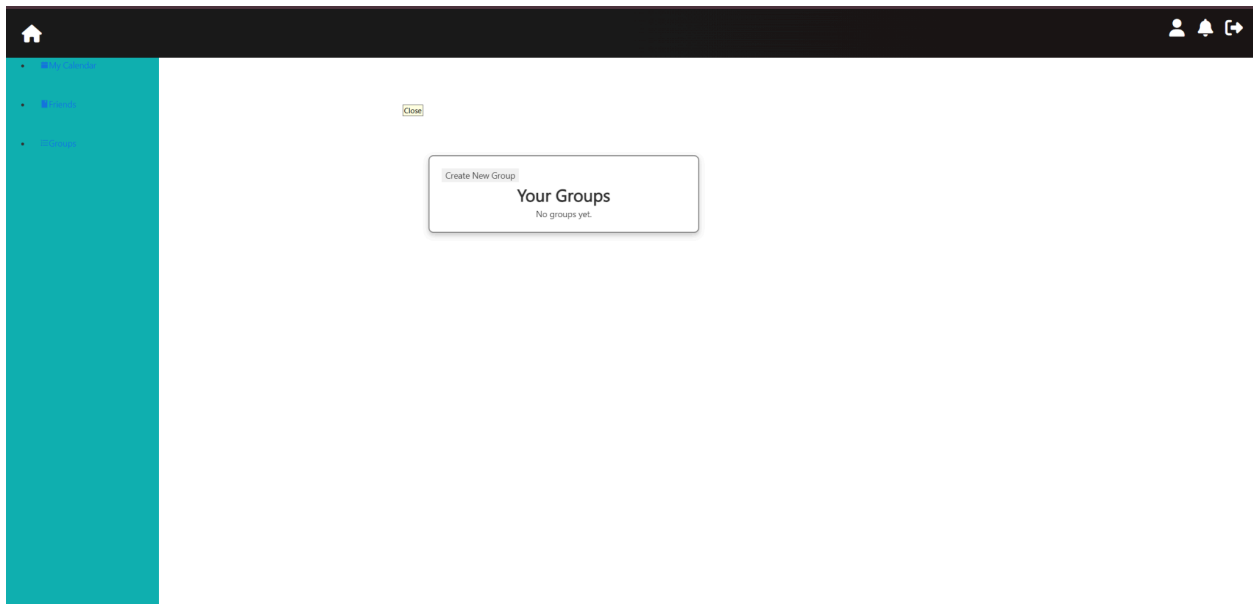

When clicking on friends, a box will show up. This box is draggable, position it where you feel it fits the best:

(Currently, the link between the backend and front end is missing, so it can work properly.)

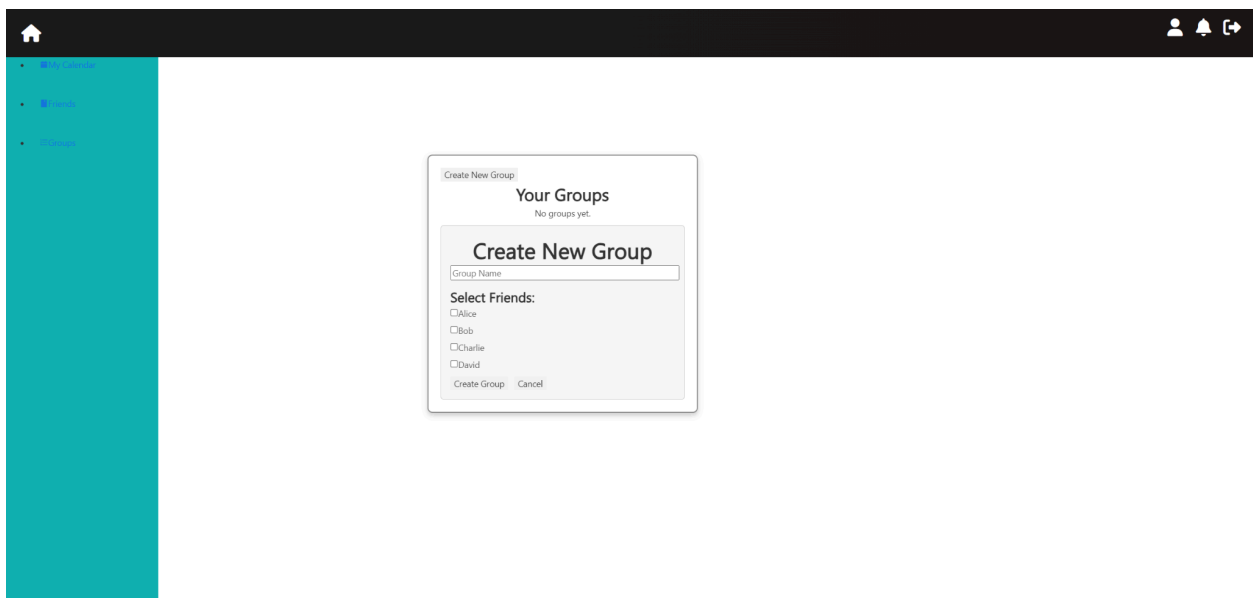

By clicking on groups it will display another draggable box:

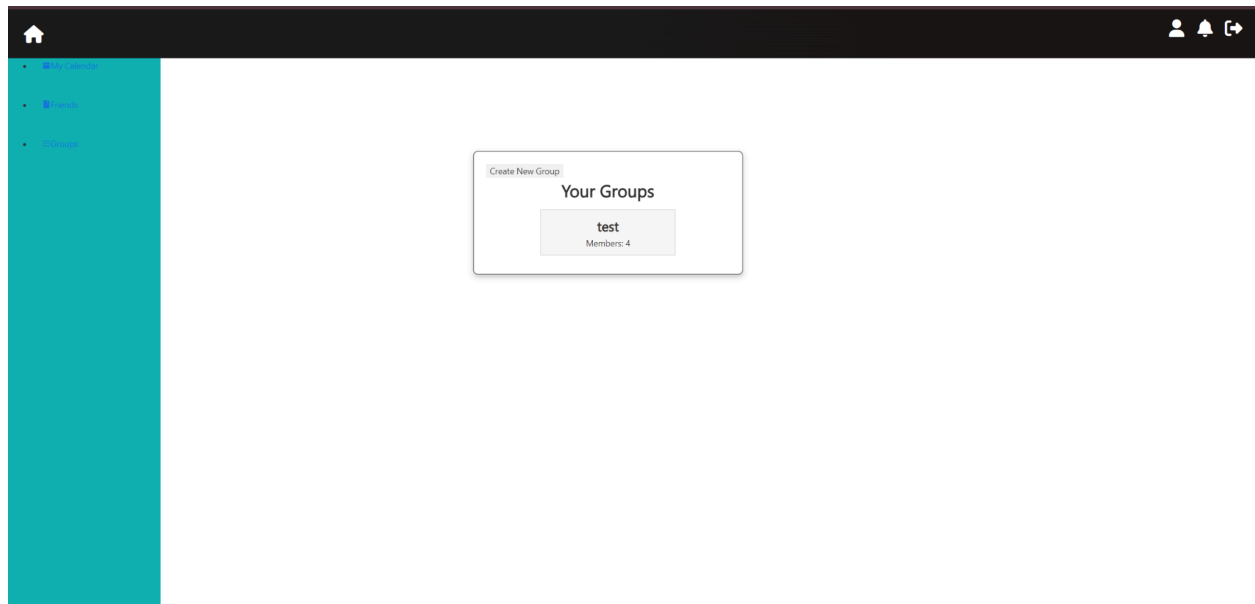

When you click on “Create New Group”, it will display a sub box with the possibility to create a group:

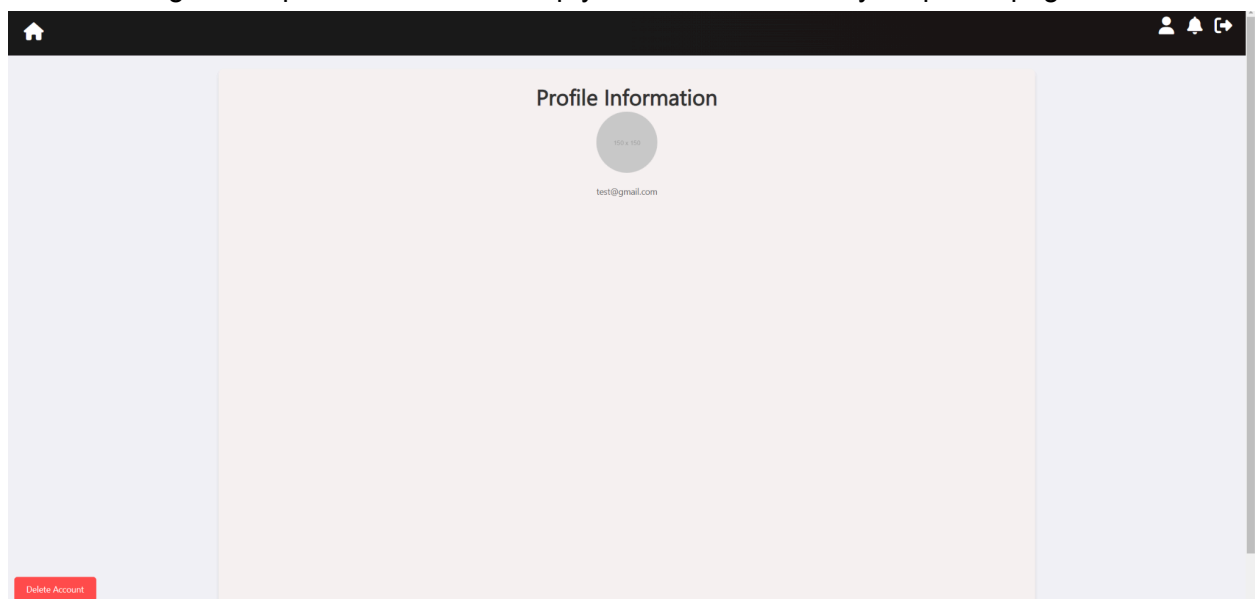

(The values for friends are just placeholders by now, missing backend integration)

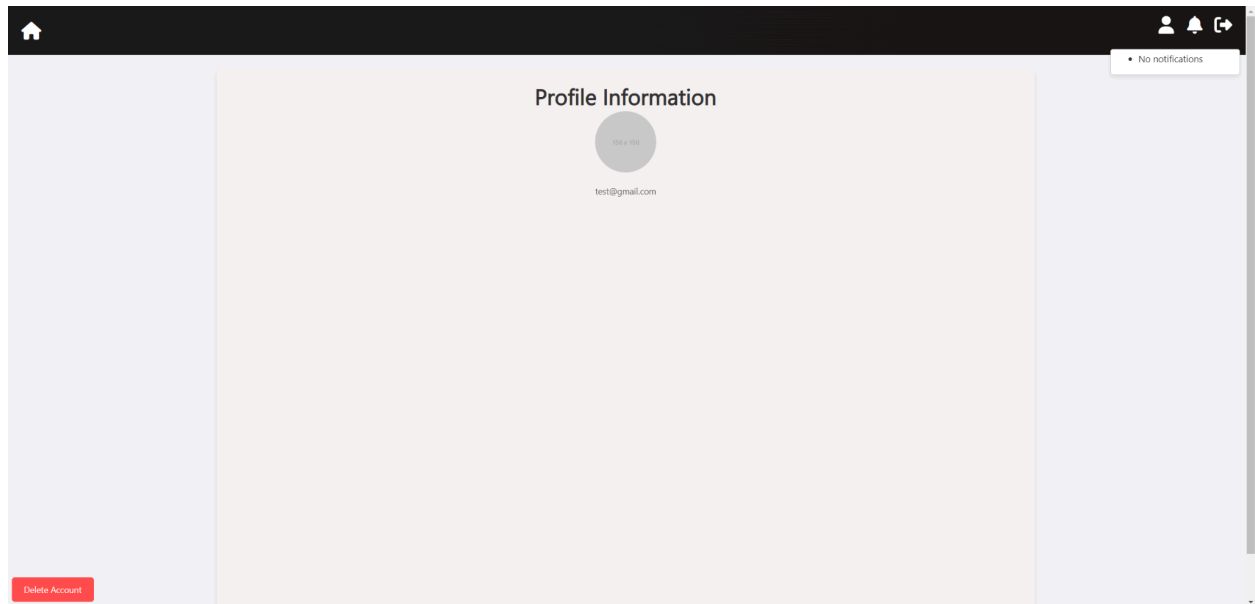

When a new group is created, it will display the following:

When clicking on the person icon on the top you are redirected to your profile page:

On each page you can click on your notification bell so it displays the notifications:

Click on the House icon on the left to return to the home page:

And click on the Logout icon to leave the app.
